◔ Experience

Olympusat
Jr. Backend Developer

Nov. 2019 – June 2023
West Palm Beach, FL

- Refactored CRUD Content Ingestion System by adding queue system supporting multiple languages, improving the performance of FreeTV, Olympusat's flagship streaming platform.
- Designed Elementor widgets to enable non-technical staff to create front-end features.
- Maintained Oly RESTful API (LAMP) that delivers 40,000+ hours of Spanish/English content to 1 million viewers on Samsung, Roku, iOS, Android, and Vizio devices.
- Created a microservice for exporting FreeTV data to S3 buckets for ingestion by Domo.
- Developed querying interface for non-technical staff to securely pull data from production RDS DBs.
- Rebuilt Olympusat.com to utilize WordPress best practices and integrate with Elementor.
- Contributed to team documentation goals by standing up internal team wiki.

STUDIOTWENTYSEVEN
Web Content Manager

Mar. 2019 - Feb. 2021
Miami, FL

- Designed WordPress theme and managed webpage SEO for higher visibility in search indexing.
- Compressed all site images with minimal quality loss, decreasing webpage load time by 45%.

FastSigns
Graphic Design & Production Artist

Mar. 2016 - Nov. 2019
Hollywood, FL

- Setup hardware for store-wide NAS system and configured offsite backups.
- Produced responsive digital signage webpages for Chromecast kiosks.

⚗ Side Projects
